

# MAY 5TH

# SCHEDULE

May 5th was selected for this significant date in history in 1961 when Astronaut Alan Bartlett Shepard Jr. became the First American in Space, aboard the *Freedom 7* Space capsule. The brief suborbital flight, which lasted approximately 15 minutes and reached a height of 116 miles into the atmosphere, was a milestone achievement. This trailblazing example of heroic bravery and adventurous spirit is this essence of what National Astronaut Day is all about.

## WHY DO WE BELIEVE IN ASTRONAUTS ?

The incredible experience of traveling through space is something we all dream about at one time in our life. For a very select few, this dream has become a reality. The path for every Astronaut is different, but the things they all have in common is that they are all leaders in their chosen fields, are all pioneers of space and heroic trailblazers of the unknown and they share a common belief that their individual experience and knowledge as an Astronaut can help make the world a better place for ALL.

Please join us as we celebrate these amazing individuals, their unique experiences, and ultimately, to help spread the message that... no matter what our journey in life we are ALL Astronauts.

## THANK YOU & ENJOY!
